

ABOUT

NEW ENGLAND ARBORISTS, LLC

New England Arborists, llc, was started as a result of property owners' question, "Can my tree be saved?" More often than not, tree service companies will remove trees and shrubs as an only option. These companies market the healthy timber on your property to wood brokers and use the rest for firewood and other by-products. New England Arborists views removal as the absolute last option.

Many property owners are unaware that trees and shrubs can be treated for diseases just like humans. There are products produced for specific pest and disease control of a particular tree species just like there are products available for the common cold.

Terry Ryan and Patrick Morse are veterans to the tree business, with over 20 years combined experience. Terry and Patrick worked for a tree service in the area before starting NEA, llc in June, 2008 to fill the void in the market for proper tree care.

AN AVERAGE, LARGE HEALTHY TREE COULD HAVE ABOUT 2,000 LEAVES. DURING 60 YEARS OF ITS LIFE, SUCH A TREE COULD GROW AND SHED APPROXIMATELY 3,600 POUNDS OF LEAVES. THOSE LEAVES RETURN ABOUT 70 PERCENT OF THE NUTRIENTS TO THE SOIL.

PRACTICE COMMERCIAL
TREE CARE, YOU MUST
HAVE AN ARBORIST LICENSE.**

WHAT IS AN ARBORIST?

An arborist is a tree care professional who is specially trained in all aspects of woody plant health and care. This includes the diagnosis and treatment of diseases, insect infestations and environmental problems. An arborist can recommend watering, fertilizing, pesticide applications and other programs to help maintain the long-term health of trees and shrubs. The State of Connecticut Department of Environmental Protection (DEP) licenses arborists and requires them to attend continuing education yearly. This keeps arborists up-to-date with the latest advances in tree biology, care and treatment.

WHO USES NEA, LLC?

- Home Owners
- Condo Associations
- Business Parks
- Schools
- Golf Courses
- Builders and Developers

"AND THE TREE WAS HAPPY."

The Giving Tree, Shel Silverstein

WHY PROTECT & PRESERVE?

Trees are beneficial in so many ways. Oxygen production, food and home to wildlife, prevention from erosion and air pollution filtration are just a few. In addition, trees can significantly reduce the cost to cool and heat our homes. Some studies show that well-maintained mature, healthy trees can contribute as much as 10 to 15 percent to a home's real estate value.

When a tree is in trouble,
an arborist is the person
to call for diagnosis and
tree care.

WHY CHOOSE NEA, LLC?

Only a licensed arborist can prune, cable or fertilize trees. We are fully licensed and compliant with the guidelines set forth by the State of Connecticut DEP.

NEA, LLC is fully insured. We can provide certificates of insurance upon request.

Terry Ryan and Patrick Morse are members of the CT Protective Tree Care Association (CTPA.org).

SERVICES WE OFFER

- FREE WRITTEN ESTIMATES
- TREE AND SHRUB PRUNING
- RESTORATION PRUNING
- SOIL ANALYSIS
- INSECT & DISEASE CONTROL
- FERTILIZATION
- CABLING
- WOUND FILLING & REPAIR
- BARK TRACING
- TREE MAPPING

NEA, llc performs most of its work the old-fashioned way; by climbing. Heavy machines cause damage to your property. By climbing, we eliminate the ruts in your lawn and cause no crushing or damage to existing planted materials. Again,

PROTECT & PRESERVE.
