Geoponics

- Amazing Natural Color and Feel
- Safe on Pumps
- Affordable/Low Usage Rates
- Will Fade on Tone
- Environmentally Responsible
- Tank-Mix Compatible w/ Fertilizer and Chemicals

#Endurant

## The professional choice for Turf Color!

*Professional turfgrass and landscape managers around the world are turning to Endurant Organic Colorants for a natural and long-lasting look. Endurant TE (Turf Enhancer) is a homogenous blend of organic pigments that assures a natural green color to actively growing turfgrass.*

Endurant Turf Enhancer is a temporary color enhancer intended for use from spring transition until approaching dormancy conditions occur, providing a natural looking green associated with actively growing healthy turf. Its visual appeal is unmatched by any other colorant, staying consistent with the superior colors, quality and value associated with the Endurant Turf Colorants line.

Apply Endurant TE at a rate of 16-24 oz per acre. Increase or decrease rate to achieve desired color depth. Turf conditions, equipment calibration and depth of color causes coverage rates to vary. Allow product to fully disperse into agitation following standard order of addition regarding pesticides, fungicides and fertilizers. Clean tank with water and/or tank cleaner and according to pesticide manufacturer instructions if applicable.
