Endurant Great White Line Paint for Sports Fields

Endurant Great White Line Paint for Sports Fields is the ideal lasting colorant for striping on natural turfgrass, gravel, stone and dirt, among other surfaces. It is ideal for use on athletic fields, including softball, baseball, soccer, football, field hockey and natural tracks and fields. It may also be used as temporary, non-permanent marking paint on artificial turf, asphalt or turf. Endurant Turf Colorants have long been used in sports and golf course applications. **Endurant Great White Line Paint** is an addition to that Endurant line of colorants. It's applied to any surface where striping, marking or coloring is desired. **Great White Line** Paint is specifically formulated to withstand extra wear and tear. This **Endurant Great White** is long lasting and will not smear or lead to uniform transfer with its extra binder. Great White is also environmentally friendly and non toxic. It will not harm eyes or natural surfaces. Thus, grass will not be stunted or harmed. **Great White** is ready-to-use, highly concentrated white colorant.

Recommended Use:

Apply to any natural field, such as turfgrass or dirt for striping the playing field. May be applied to other surfaces for temporary marking.

Applications Include:

- Baseball and softball fields
- Football fields
- Golf course
- Track and field areas
- Field hockey fields
- School grounds
- Fairgrounds
- Nurseries
- Construction sites

Product Highlights

- Concentrated pigments for full coverage and efficiency
- Easy to use
- Fast drying. Dries to the touch in 30 minutes
- Versatile application
- Low VOC
- Safe and nontoxic

Applying Great White Line Paint

Preparation for Application: Depending on the type of surface to be marked, prepare the surface. Turfgrass applications can be most effective when mowing the grass first at a low height to permit the most colorant low to the ground surface. Remove debris from any surface before painting. Do not apply to a wet surface. Allow adequate dry times after the application. In most conditions, **Great White** will dry to the touch within 30 minutes. Allow additional time in high humidity and low temperatures, under 50 degrees F. Protect from freezing. Stir the colorant before use. Application rates will depend on the surface and desired results.

Application Method: Great White Line Paint by Endurant Turf Colorants is optimally applied using a line-marking machine. Or, apply **Great White Line Paint** using a brush, roller or spitter. Do not dilute on first application. Subsequent coats can be diluted at rates of 2:1 for game day ready turf or 3:1 on practice fields. Select pressures, nozzles and tips based on desired results and conditions. Uniformity of appearance is attained using an airless or conventional sprayer. Thus, additional coats may be required for application by brush or roller.

Using airless spray consider these settings:

Pressure: 2000 PSI
Hose 1/4" to 3/8"
Filter: 80 mesh
Tip: .017" to .021

Conventional Spray:

Atomization pressure: 40 PSI
Fluid pressure: 10 to 20 PSI
Cap: 704
Tip: E

Clean up:

Great White water-based line paint is easy to clean immediately using soap and water
