

# ENDURANT<sup>®</sup> hazmark

## Brief Description

**Endurant HazMark** is a multipurpose marking paint made with bright organic pigments to create lines, shapes and visual locators for utilities, striping athletic fields, golf hazards, and other uses. It is non toxic and suitable for use on turfgrass, soil, pavement, gravel and other surfaces, lasting up to three months.

## More About HazMark

**Endurant HazMark** is named after its popular use to mark hazard areas, including water hazards, on a golf course. Like other colorants in the Endurant line, **HazMark** is versatile while providing economical, agronomical and environmental benefits. It's used for marking utility areas, construction, turfgrass and sports industries. Staying true to the Endurant brand, **HazMark** is made with organic pigments, available in red, yellow and white. It is combined with excellent binders for long lasting adherence. Instead of using aerosol spray cans and reapplying frequently, **Endurant HazMark** is sprayed without aerosol. It is nontoxic and does not harm turf. It lasts up to three months, depending on conditions. **HazMark** can be mixed with other products, such as growth regulators, which keep the grass from growing quickly, and thus, **HazMark** may last even longer, eliminating the repeated use of multiple cans and labor involved in reapplication.

## Rates & Application

- *Mix at a rate of 10:1, water to HazMark.*
- *Apply product with spray equipment to paint desired line or shape on turf, soil or other surface.*
- *Allow to dry two to three hours to avoid tracking.*

## Benefits

- *Long lasting color.*
- *Bright visual appeal.*
- *Made with organic pigments.*
- *Made with powerful binders.*
- *Decreases waste compared with spray can applications.*
- *Environmentally beneficial compared with aerosol brands.*
- *Economical.*
- *Easy to apply.*
- *Fast dry time.*
- *Decreases need for frequent re-application.*
